SKILLS

Java   Spring   AngularJS   MySQL
Front-end development   Back-end development
HTML   CSS   Bootstrap

TEAM-PROJECTS

Coaching Website
- Developed a visually appealing and responsive web application using HTML and CSS.
- Utilized Angular and JSON to implement CRUD operations (Create, Read, Update, Delete) for efficient data management.
- Successfully integrated a secure login and signup form, ensuring user authentication and data protection.
- Demonstrated proficiency in front-end development by creating a user-friendly interface.
- Showcased strong back-end development skills in designing and implementing robust functionality.
- Ensured data integrity and security throughout the application.
- Users can search for Course by title, genre, or keywords, making it easy to find specific course of interest.
- Received positive feedback from users on the functionality and usability of the web application.
- Demonstrated the ability to deliver high-quality and functional.
- Strengthened knowledge and skills in Full-stack development through this project.

Role- UI/UX Database design (Front-End Developer)
